

# BRAIN TALENT PROFILE

For **Lize Rech**

Date: **June, 17 2019**

Like a smart phone app, a “Brain App” is a tool for your brain. These “apps” let you perform important processes using cognitive + emotional data to achieve results. These learned capabilities help people be effective at work and in life.

## Your Top Brain Talents in Order

### Vision

Brains with this App are engaged by creating long-term meaning, which can then engage energy.

### Prioritizing

Brains with this app can identify logical possibilities and sort to identify what’s important.

### Reflection

Brains with this App are likely to assess risks and evaluate before jumping into action.

### Entrepreneurship

This App enables a capability to see the future, turn problems into opportunities, and then create a path forward.

### Design

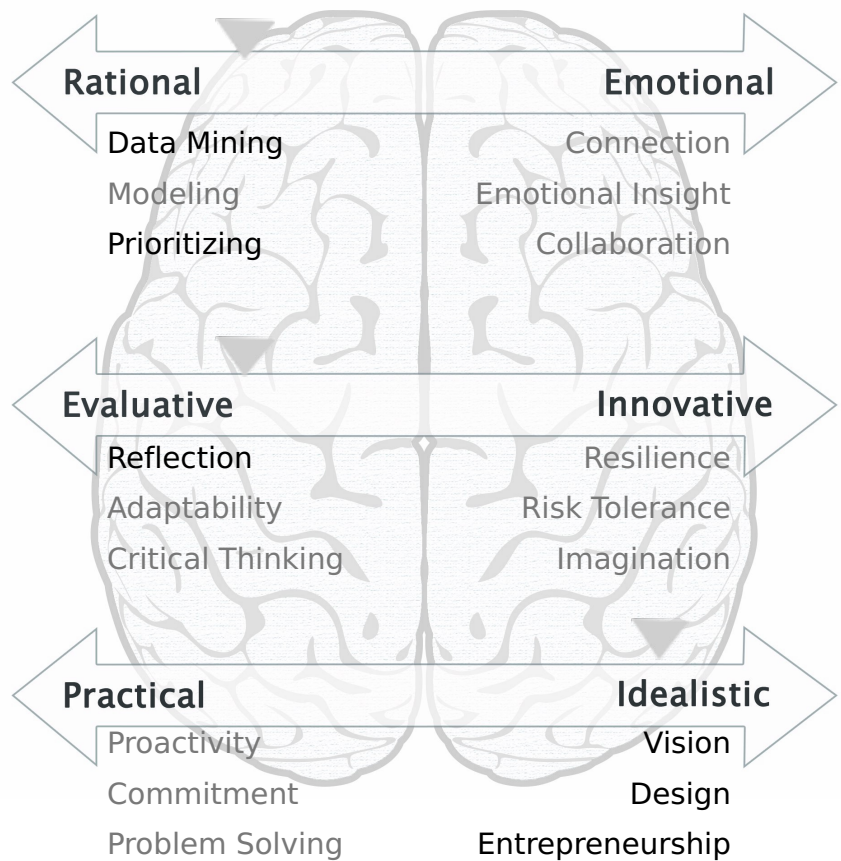

This App enables long-term vision to be blended with accurately seeing the current reality.

### Data Mining

Brains with this App can observe accurately, noticing details and how they fit.

The 18 “Brain Apps” – your top 6 are highlighted:
